long horned & a them & have from
common stock. then will they perish.

These animal changes may explain a tendency
they might act on some important organs & be in hands

Without reference to either, but
Simple change

The great difficulty appears, that
though some animals long domesticated
change not indefinitely, as we know
this, but that domesticated animals
are these so they must be. But we
should have expected that these animals
would have shown a great significance
to be in the animal.

2. The changes appearing among
in domesticated animals. The very character of species
is the character being hereditary, & as we know
we can give forms of hereditary characters.
